Youth-Led Community Psychosocial Support in the Gaza Strip

Project Information

- **Department: Public Health Emergency Management Center**
- **Unit: Community Engagement**

OBJECTIVES

The project aims to empower youth to lead community-based psychosocial support initiatives, improving the well-being, resilience, and social connectedness of conflict-affected communities in the Gaza Strip

BENEFICIARIES

The primary beneficiaries are youth in the Gaza Strip, particularly those engaged in community-led psychosocial support initiatives, as well as conflict-affected community members benefiting from psychosocial support activities

REGIONS OF WORK

Palestine (Gaza strip)

PROJECT PHASES

1. Project Preparation and Planning
2. Youth Engagement and Mobilization
3. Community Support Implementation
4. Monitoring and Reporting

PROJECT DESCRIPTION

The project focuses on empowering youth to lead community-based psychosocial support initiatives in the Gaza Strip, enhancing access to psychosocial support for conflict-affected communities. Through youth engagement and community-led activities, the project aims to promote mental well-being, strengthen resilience, and foster social connectedness among vulnerable populations.

Project Start and End Date	**October 2025 - December 2026**
Partner Organizations	**SDF**
Funded by	**UNFPA**

Currently . . .

the project is in its implementation phase, with activities focused on youth engagement and the delivery of community-based psychosocial support initiatives in the Gaza Strip.

What's next . . .

The project promotes sustainability by building the capacity of young people to continue leading community-based psychosocial support initiatives beyond the project period. By strengthening local engagement, peer support, and community ownership, it aims to establish a foundation for continued psychosocial support and resilience within affected communities in the Gaza Strip.

GHD|EMPHNET Information: Global Health Development (GHD) Eastern Mediterranean Public Health Network (EMPHNET) works at achieving its mission by responding to public health needs with deliberate efforts that allow for health promotion and disease prevention.
